Thanks for responding. Bridget continues to mischaracterize things and we need to correct it as often as we can. She has said the same thing a couple of times.

**Subject:** RE: Deletion docket

The documents will be placed in the information repository when the Notice of Intent to Delete is published and the public comment period starts. Meanwhile, last time I checked a couple of months ago, there were cds with the entire administrative record for OU2 removal action, as well as cds with all the significant documents to date for OU2 in general. In addition, there were a couple of site fact sheets, contacts, and the CAG Binder that was filled to bursting with information in both English and Spanish about the site. I will check and see if it's all gone missing. That would be at least the second time that someone has taken it.

"It is recommended that regional program offices work with their regional Superfund deletions coordinators and records management staff to ensure that complete copies of the documents in the deletion docket are developed and placed in the appropriate regional, local, and FDMS site repositories. The public will have an opportunity to review the docket during the 30 day public comment period that follows publication of the Notice of Intent to Delete (NOID). Public meetings are optional. Deletion notices are optional."

Dear Steve,

Do you intend to update the public file for VB/I70 at the public library? The last time I checked there was one thin piece of paper in

the file and it had been that way, according to the librarians,  
forever. Is that Jesse's responsibility of Jennifers?  
Thanks for your help.
